

Nortel-Compatible Push-to-Talk, Push-to-Mute, and Noisy Location Handsets

Algo Specialty Handsets are modified original Nortel handsets providing Push-to-Talk, Push-to-Mute, or Noise Reduction functionality for Nortel digital, IP, and Meridian Digital Centrex telephones.

These quality handsets feature an ergonomically designed "soft-touch" button. The user only needs to apply light pressure to maintain Push-to-Talk or Push-to-Mute functionality. Algo handsets are designed for durability, comfort, and reliability.

PTT (Push-to-Talk) Handset

- Disables microphone until button is pressed, allowing normal conversation
- For more information, please visit www.algosolutions.com/ptt

PTM (Push-to-Mute) Handset

- Disables microphone when button is pressed to mute transmit speech and background noise
- For more information, please visit www.algosolutions.com/ptm

Noisy Location Handset

- Reduces background noise, allowing clearer voice transmission in noisy locations
- For more information, including audio samples, please visit www.algosolutions.com/noisy

Typical Applications

- Financial trading
- Banks
- Dispatch
- Military
- Emergency services
- Conference call participants
